

INDUSTRIAL LIGHTING UPGRADE

By choosing to participate in the Industrial Lighting Upgrade, you are choosing to reduce power consumption, lower your carbon footprint and (most importantly) **SAVE MONEY!** Replacing lighting fixtures with energy-saving alternatives and applying for the utility sponsored rebates can have a simple payback period as little as 1 month!

See reverse for more details.

Rebates will be issued to customers replacing low-bay and high-bay lighting features with fixtures consuming less power.

What's eligible?

- T12 Fluorescent (magnetic ballast)
- T8 Fluorescent (magnetic ballast)
- Mercury Vapor
- Metal Halide
- T8 Fluorescent (Electronic Ballast, Normal or "Super T8")
- T5 Fluorescent (Normal or High-Output)
